

FAQs About E-Recycling Collection Events

What is an electronics collection event?

An electronics collection event is a scheduled opportunity for businesses, employees, or communities to safely dispose of unwanted electronics.

Who can participate in collection events?

Events can be tailored for employees, clients, community members, or municipal partnerships.

What types of items can be brought to an event?

Typically accepted items include computers and laptops, phones and tablets, peripherals and accessories, and small electronics.

Do you offer data destruction at collection events?

Yes. Secure data destruction options can be incorporated into events, depending on the scope and requirements.

How are materials handled after the event?

All materials are transported through secure logistics and processed according to certified recycling and data destruction standards.

Can events be customized for our organization?

Yes. Events can be branded, scaled, and structured to meet your goals, whether that be employee engagement, ESG initiatives, or community outreach.

Do you help with event planning and promotion?

Yes. Support can include planning, logistics coordination, and guidance on communication and promotion.

Are collection events compliant with regulations?

Yes. All materials are handled in accordance with applicable environmental and data security regulations.

How do collection events support sustainability goals?

They divert e-waste from landfills, promote responsible recycling, and provide measurable environmental impact.

Can collection events support corporate social responsibility (CSR) initiatives?

Yes. These events are an effective way to engage employees and communities while demonstrating environmental leadership.
