

We Give Electronics Their Next Best Life™

What Happens After You Drop Off Your Electronics?

When you recycle your electronics, they don't just "go somewhere."

They begin a carefully managed journey — **focused on protecting your data and protecting the environment.**

STEP 1 You Drop it Off

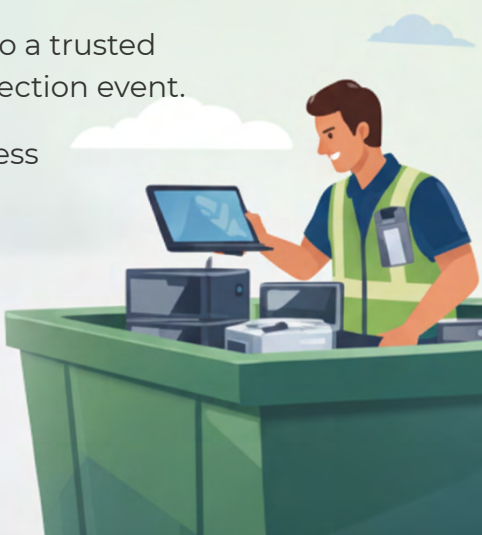

You bring your old electronics to a trusted drop-off site or community collection event.

Our team helps make the process quick and easy.

Common items include:

- | | |
|---------|----------|
| Laptops | Monitors |
| TVs | Printers |
| Phones | Desktops |

No guesswork. No hassle.

STEP 2 Your Devices Are Secured

After collection, your electronics are carefully organized, palletized, and transported to a certified facility.

They're handled **securely** from the moment you drop them off.

- ✓ Controlled handling
- ✓ Secure transportation
- ✓ Certified processing facility

STEP 3 Your Data is Protected

What happens to my data?

It's one of the most important questions people ask about electronics recycling.

Before anything else, devices that may contain personal information go through secure data destruction processes.

That means:

- ✓ Verified security procedures
- ✓ Strict compliance standards
- ✓ Responsible downstream management

We don't just recycle electronics.

We protect the information stored on them.

STEP 4 We Determine the Best Next Step

Every device is evaluated.

Some electronics:

- ✓ Get a second life through refurbishment
- ✓ Support repairs through parts recovery
- ✓ Are recycled to recover valuable materials

Our goal is always to find the most responsible outcome

STEP 5 Valuable Materials Are Recovered

Electronics contain valuable materials like copper, silver, and gold.

When properly recycled:

- ✓ These materials are recovered
- ✓ Fewer new raw materials need to be mined
- ✓ Environmental impact is reduced

For every 1 million cell phones recycled:

- | | | |
|-----------------------------|--------------------------|-----------------------|
| 35,000 lbs
Copper | 770 lbs
Silver | 75 lbs
Gold |
|-----------------------------|--------------------------|-----------------------|

That's real impact.

STEP 6 Real Environmental Benefits

Every device is evaluated.

Recycling electronics:

- ✓ Keeps devices out of landfills
- ✓ Reduces environmental harm
- ✓ Conserves energy
- ✓ Supports a circular economy

Recycling 1 million laptops saves enough energy to power 3,500 homes for an entire year.

Every device makes a difference.

Thank You for Recycling Responsibly

By choosing to recycle your electronics, you're helping protect your data, your community, and the environment.

That's what giving electronics their next best life is all about.

In partnership with

Secure. Responsible. Sustainable.
