

FAQs About E-Recycling Logistics

What logistics services do you provide for electronics recycling?

Dynamic provides end-to-end logistics, including pickup, transportation, packaging guidance, and coordinated scheduling. We utilize both in-house assets and brokerage teams to meet our customers' service requirements both domestically and abroad.

Can you support large-scale or complex logistics needs?

Yes. Services are designed for enterprise environments, including multi-site coordination, large volume pickups, and ongoing programs.

How do you ensure consistency across multiple locations?

Standardized processes, centralized coordination, and dedicated account management ensure consistency across all locations.

Do you provide packaging or containers for equipment?

Yes. We can provide containers, pallets, or packaging guidance to ensure safe and efficient transport.

How are materials handled after the event?

All materials are transported through secure logistics and processed according to certified recycling and data destruction standards.

How are pickups scheduled?

Pickups are scheduled based on your operational needs, with flexible options for one-time or recurring service.

Can you handle urgent or time-sensitive pickups?

Yes. Expedited services are available to meet tight timelines or urgent project needs.

What happens after materials are picked up?

Materials are transported to certified facilities where they are processed according to service type (reuse, data destruction, recycling).

Do you offer nationwide logistics coverage?

Yes. Logistics networks support regional and national programs with consistent service delivery.

How do you minimize disruption to our operations?

Programs are designed to integrate with your workflows, minimizing downtime and operational impact.
