

EPR Without the Operational Burden

A Practical Guide for OEMs Looking to Simplify Compliance, Reduce Risk, and Gain Control

THE CHALLENGE ISN'T JUST COMPLIANCE — IT'S CONTROL

EPR compliance has become a permanent part of doing business for manufacturers. But managing it across multiple jurisdictions is where things get complicated.

Requirements evolve. Deadlines shift. Data comes from everywhere. And accountability? It's often spread across multiple vendors.

Most organizations are meeting their obligations — but not always with full visibility or confidence.

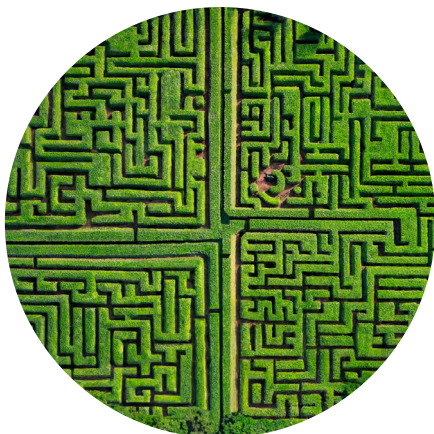

And that's where the real challenge starts.

Because as regulations expand, the question isn't just:

“Are we compliant?”

It becomes:

“Are we fully in control of our compliance program—and could we prove it if we had to?”

THE HIDDEN COST OF A FRAGMENTED APPROACH

When EPR management is distributed across systems, and vendors, things can still get done—but not always efficiently or predictably.

Over time, that can lead to:

- ⊗ Inconsistent or hard-to-verify data
- ⊗ Limited visibility across jurisdictions
- ⊗ Gaps in documentation or audit readiness

None of this is intentional — it's just the natural result of managing a complex, evolving requirement without a fully integrated model.

WHAT THIS LOOKS LIKE INSIDE A WELL-RUN ORGANIZATION

For many manufacturers, EPR compliance isn't owned by a single partner—it's shared across multiple vendors. And when things are working, it often looks like this:

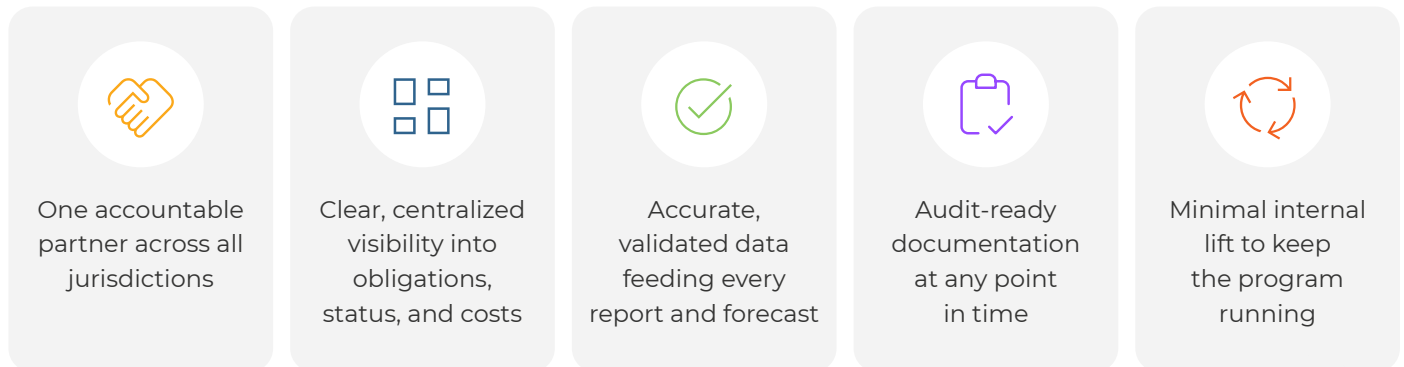

This approach works — but it requires consistent coordination, internal effort, and trust that every moving part is aligned.

WHAT GOOD ACTUALLY LOOKS LIKE

Leading manufacturers are rethinking this model — not because it's broken, but because it can be simpler, more transparent, and easier to manage.

A more controlled EPR program looks like:

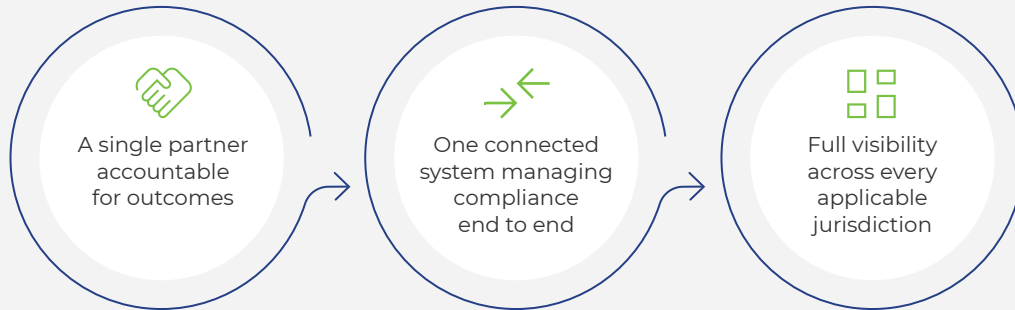

In short: fewer moving parts, fewer surprises, and more confidence.

WHERE DYNAMIC FITS IN

Dynamic Lifecycle Innovations brings this model to life through a fully managed, integrated EPR compliance program.

Instead of coordinating across multiple vendors and internal teams, you have:

We combine regulatory expertise, operational execution, and compliance intelligence into one streamlined approach—so your program runs smoothly behind the scenes.

WHAT THIS MEANS FOR YOUR BUSINESS

- You reduce risk with audit-ready documentation and validated data
- You simplify operations with end-to-end program management
- You gain real visibility into obligations and performance
- You free up internal resources for higher-value work
- You protect your brand and data with certified, secure processes

WHAT WE TAKE OFF YOUR PLATE

- ✓ Legislative and regulatory program management
- ✓ Data collection, normalization, and validation
- ✓ Reporting, registration, and fee management
- ✓ Obligation forecasting and fulfillment
- ✓ Recycling, logistics, and takeback programs
- ✓ Vendor and downstream compliance oversight
- ✓ Audit-ready documentation and regulator support

BUILT FOR MANUFACTURERS WHO EXPECT MORE

Dynamic supports OEMs across 27 legislated jurisdictions, with deep state-level expertise and active regulatory engagement.

Customers rely on us for:

- ✓ Responsive, high-touch support
- ✓ Transparent communication
- ✓ Consistent accuracy and on-time delivery
- ✓ Accountability you can rely on

A SIMPLER WAY FORWARD

EPR compliance isn't going away—but the burden it creates can.

With the right model in place, you can move from:

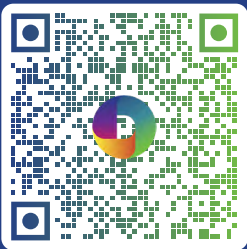

- Coordinating → Controlling
- Reacting → Planning
- Managing risk → Reducing it

Fully managed compliance.

Less internal effort.

Greater visibility.

Confidence at every step.

DO YOU HAVE A CLEAR VIEW OF YOUR EPR PROGRAM TODAY?
